Education

Illinois Institute of Technology — Chicago, IL
M.S. in Computer Science — *Aug 2023 – May 2025*

Vignana Bharathi Institute of Technology — Hyderabad, India
Bachelor's in Information Technology — *Aug 2019 – May 2022*

Experience

Minara Tech | minaratech.com — Remote
Founding Software Engineer (Sole Developer) — *May 2025 – Present*

- Architected and built a multi-tenant SaaS platform for community organizations (members, families, programs, events, volunteers, donations) with Next.js, React and TypeScript.
- Built 135 API endpoints as Next.js Route Handlers, each enforcing auth and organization-scoped Prisma queries for tenant isolation.
- Designed a shared-database multi-tenant model on Supabase PostgreSQL, with org-level data isolation, cookie-based org switching and super-admin access.
- Rendered admin pages as React Server Components querying Prisma directly, with all UI mutations routed through the API layer.
- Secured public endpoints (embeddable forms, payment webhooks) with domain allowlists, webhook secrets and rate limiting.
- Built "Ask Minara," an AI assistant on a multi-provider LLM layer running self-hosted models via Ollama, with encrypted credentials.
- Designed a responsive, component-based UI with Tailwind CSS, CSS Modules and Recharts dashboards for member and admin experiences.
- Deployed on Vercel with Supabase Auth (SSR), Upstash Redis caching, Resend email and long-running serverless jobs for data ingest.

Rapha Medic — Hyderabad, India
Software Development Intern — *Dec 2022 – May 2023*

- Delivered RESTful APIs with JSON request/response handling supporting 30+ application modules.
- Automated CI/CD pipelines with Jenkins and GitHub Actions and automated testing, cutting deployment cycles by 40%.

Null Class — Hyderabad, India
Web Developer Intern — *Sep 2022 – Nov 2022*

- Developed a full-stack MERN Q&A platform inspired by Stack Overflow with real-time question posting and answers.
- Built JWT-based authentication with role-based access control and complete CRUD workflows.
- Optimized rendering and backend queries, cutting page load time by 15% and unauthorized access incidents by 20%.

Projects

JobAI – AI-Powered Career Assistant | *Next.js, Django, PostgreSQL, ChromaDB, OpenAI, Docker*

- Built an AI career copilot with resume uploads, job tracking, match scoring and AI-generated resumes and cover letters.
- Integrated ChromaDB embeddings and OpenAI GPT-4o-mini for semantic job matching and personalized suggestions.
- Containerized the app with Docker Compose (Next.js, Django, PostgreSQL, Nginx) for one-command deployment.
- Deployed front end and back end as separate Render services, migrating the database to Supabase PostgreSQL.

AskMyWali – Real-Time Matchmaking Platform | *Flutter, Node.js, Express, PostgreSQL, Prisma, Socket.io*

- Built a cross-platform Flutter app (mobile + web) with profiles, guardian-assisted onboarding and an admin dashboard.
- Designed a RESTful Express API with Prisma ORM on PostgreSQL, secured with JWT middleware and bcrypt.
- Developed real-time chat and live match notifications with Socket.io.
- Built a like system and guardian invitations with email notifications via Nodemailer (SMTP).
- Implemented responsive layouts for mobile, tablet and desktop, with Provider for state management.

Technical Skills

Front-End:	React.js, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Recharts, Flutter (Dart)
Back-End & APIs:	Node.js, Express, Django, FastAPI, REST APIs, WebSockets, Socket.io
Data & Auth:	PostgreSQL, Supabase, Prisma, MongoDB, Redis, Supabase Auth (SSR), JWT, bcrypt
Tools & Cloud:	Git, GitHub Actions, Docker, Jest, PyTest, AWS (EC2, S3, Lambda)
Languages:	TypeScript, JavaScript, Python, Java, SQL
Business Tools:	Salesforce, DocuSign, Microsoft Word
